

MSC May-Aug24

FLATTHALL

Examination approach - Structure and format

- ✓ The examination is three hours long. A 15-minute tutorial is available before the start of the examination to allow candidates to familiarise themselves with the test driver.
- ✓ The examination has four sections (tasks), which are each 45 minutes long. All sections are equally weighted. Candidates may finish a section early and move on to the next but cannot return to previous sections in the time remaining.
- ✓ There may be more than one sub-task within each section and an indication of how long to spend on each sub-task will be given, to allow candidates to manage their time. If no weighting is given, then candidates should assume that the sub-tasks are equally weighted.
- ✓ All core activities will be assessed in each form of the examination in line with the weightings. A sample of related assessment outcomes will be tested.

Examination approach- Item types

- ✓ The examination requires constructed, written responses from candidates in the format of a range of business communications (for example, emails, memos, reports, briefing notes).
- ✓ Word processing capabilities will be provided within the test driver to allow the formatting and presentation of responses in a professional manner.
- ✓ Examination tasks will not be set that require specific calculations. However, candidates should, wherever possible, show how they have used and interpreted data from the pre-seen and the new information presented during the examination and/or undertaken analysis or calculations to support their responses.

Examination approach-Marking, grading and feedback

- ✓ The Case Study Examinations are human marked.
- ✓ The Case Study results will contain the following information:
 - Grade: Pass or fail
 - .Scaled score: 0 to 150 with 80 and above being a pass .
- ✓ There is no requirement to obtain a pass or meet a minimum threshold for each core activity.
- ✓ Feedback on performance against each core activity will be provided so that learners know their areas of weakness for further study.
- ✓ Grade descriptors for both the overall passing standard as well as each core activity will be available six months before the first examination and this document will be updated with that information.

Finance manager—simulating the job tasks

Within each Management Case Study Examination, five core activities will be assessed. These core activities represent the tasks that are most frequent, critical and important to the role of a finance manager.

The five core activities are:

- A. Evaluate opportunities to add value
- B. Implement senior management decisions
- C. Manage performance and costs to aid value creation
- D. Measure performance
- E. Manage internal and external stakeholders

Management Case Study - Examination blueprint

Core Activity	Assessment Outcome	Weighting
